

PRODUCT SAFETY DATA SHEET:

Product	YUPO (FDR Grade)
Intended Use	A substitute for conventional paper, where high dimensional stability, water repellency or other property is required.
Composition	Polypropylene layers, containing inorganic fillers, antioxidants and other additives, with a surface treatment to improve acceptance of printing ink.
Health Hazards	No health hazards have been reported in connection with use of YUPO's products since commercial production started 1972.
Food Use	Yupo FDR is considered safe for direct food contact use for more than 24 hours at temperatures up to 40°C with aqueous, alcoholic, fatty and dry food. This grade is not suitable for contact with acidic food (pH <4,5). It is the responsibility of the end-user to check that the product complies with any national legislation, before permitting such use.
Fire Hazards	Will burn if ignited; no toxic gases evolved during combustion other than normal combustion products, i.e. carbon monoxide and carbon dioxide.
Environmental Hazards	No environmental hazards are associated with this product. It does not contain cadmium, PCB's or dioxin.
Storage	As for any conventional paper; keep dry and away from extremes of heat.
Handling	This product should be handled in the same way as conventional paper. Dust can be evolved during printing. This is the inorganic filler.
First Aid	Should a minor cut happen during handling of this product, it should be cleaned and covered as normal practice.
Disposal	This product should be disposed of as for normal paper. It should not be added to paper waste which is intended for recycling. If incinerated, this should be carried out with an adequate supply of air to ensure complete combustion.
Recycling	Yupo can be recycled as Polypropylene.
