Accordingly, the films of our Exterior Film series offer you the possibility to give your exterior a new face in a cost-effective as well as resource-saving way and to benefit from the numerous advantages of the “new” renovation.

EX 669

EX 438

EX 860

Due to our selection of designs, it is possible for you to live out your creativity and preferences to the fullest when designing your building exterior. Thus, it is possible to make your building individual and unique through personal choice of design.

Simple and ecologically friendly assembly:

Another advantage is the simple and clean assembly, which makes it possible to achieve great results in a very short time, with little waste products.

Sustainable way of renovation:

In addition, our product scores in terms of sustainability, as the film can be used to effortlessly renovate and redesign older and/or aging facades instead of replacing them completely.

Warranty / Durability

The foiled surfaces are easy and effortless to clean due to their dirt-repellent surface. In addition, we guarantee at least 7 years of weather resistance and the Durability is more than 10 years.

Features

The films must be installed on a clean smooth, rigid and non-porous surface.

Vinyl film for outdoor use with polymeric adhesive with air channel. Material thickness 200 to 350 μ .

Processing between 15 to 35 degrees Celsius.
