VinylEfx®

VinylEfx® Indoor decorative vinyl

VinylEfx® films are used to produce eyecatching decorative graphics. They can be plotter cut, screenprinted and also printed using digital UV, eco-solvent and solvent based ink systems. Also compatible with new generation latex inks (700 and 800 latex series). VinylEfx® installs just like other vinyl films and can be applied to flat and slightly curved surfaces. VinylEfx® offers indefinite indoor life with proper care and handling.

VinylEfx® Outdoor durable vinyl

Outdoor Durable VinylEfx® is designed for digital printing and plotter cutting. The films offer up to 3 years exterior life if correct installation procedures are followed and the product is suitable for the intended application. We recommend that all exterior applications are edge sealed (with our Seal-it Pen) to ensure optimum service life. Please see our website for details on application and helpful tips and tricks.

For ease of installation, apply VinylEfx® metallized vinyl with RTape Conform® 4075RLA application tape. When printed with UV, use RTape Conform® 4760RLA application tape.

PolyEfx®

PolyEfx® Indoor polyester film

PolyEfx® series are metallized print treated polyester films coated with a high tack permanent pressure sensitive adhesive and a 137 gsm stayflat release liner. This product is intended for use as a high quality marking in applications requiring durability, high temperature and dimensional stability.

Thanks to the high tack adhesive system, these printable films can be used on a wide range of smooth substrates.

Primarily intended for indoor applications. Outdoor durability up to 3 months when laminated with Nekoosa Polyester Laminate (LM2CL).

For ease of installation, apply PolyEfx® metallized polyester with RTape Conform® 4075RLA application tape. When printed with UV, use RTape Conform® 4760RLA application tape.

Applications

Eco-friendly metallized cut lettering

Printed markings

Wide range of smooth substrates

Indoor applications and short-term outdoor applications
